

FRP FILTER HOUSING FRP

DESCRIPTION

Filter housing designed to suit a single High Flow style cartridge. Shell is constructed in Glass Fibre Reinforced Plastic.

Ideal for high flow applications. Multiple units can easily be configured together.

FEATURES

- Housings available to suit either 20", 40", or 60" cartridges
- Inlet/Outlet connections are 3" PVC Welded
- Inlet/Outlet configuration: side-port, end-port
- Compact design allows easy installation and quick filter change-out
- Can be installed either horizontally or vertically
- Seal material options: EPDM, Viton, Silicone
- Corrosion resistant, ideal for salt water applications
- Couplings available as an optional extra to connect with pipeline

TYPICAL APPLICATIONS

- Salt Water
- Desalination
- Pre-RO
- High Flow

<u>TECHNICAL SPECIFICATIONS</u>	<u>FRP</u>
Design Pressure	1000 kPa
Length	20" / 40" / 60"
Shell Material	FRP
Side Port Material	Nylon
End Cap Material	ABS
Operating temperature	Max. 70 °C
Qty and style of filter cartridge	(×1) HF150 Cartridge
